

GLENROSSIE

Beef Shorthorn and Santa Gertrudis Stud

28th ANNUAL BULL SALE

**to be held on the property of Ody Bros Ltd
405 Ody Road, Taurikura, Whangarei Heads
and online via Bidr**

**Friday 21st of June 2024
Auction starts 1.00pm**

**David (Fred) and Tracy Ody 09 434 0987
Fred 027 4340 987
Tracy 027 543 1045**

**View sale bulls online including photos and videos at
www.glenrossie.co.nz**

**OFFERING COMPRISES OF
16 R2yr Beef Shorthorn Bulls
6 R2yr Santa Gertrudis Bulls**

**AUCTIONEERS PGG WRIGHTSON LTD
Bernie McGahan
A/H 09 425 7102 or 0275 902 210**

CONDITIONS OF SALE

- The sale will be conducted in accordance with conditions of sale set down by the Northland Stock and Station Agents Association - a copy of which will be exhibited at the sale.
- **RISK:** Each lot will be at the risk of the purchaser as from the fall of the hammer. No errors or omissions in this catalogue will in any way invalidate the sale.
- **FINANCE:** Terms are cash before delivery unless credit arrangements have been made with the Auctioneers prior to sale.
- All bulls in this catalogue are guaranteed fertile.
- This herd is Tuberculosis and Brucellosis accredited.
- Buyers are advised to complete the instruction slip in the back of the catalogue as to transport, insurance and transfers.
- An over-riding commission of 6% is payable to non-participating Companies introducing buyers prior to the sale.

DISCLAIMER

All details and descriptions as to stock referred to in this catalogue have been supplied to PGG Wrightson by the Vendor and have not been independently verified by PGG Wrightson. PGG Wrightson, its employees and agents make no representations or warranties or acknowledgement of any kind whatsoever in relation to any part of this catalogue (including but not limited to the accuracy or completeness of details and descriptions of stock [and other contents]).

Purchasers, advisors and all other persons viewing or dealing with the stock must make their own assessment and judgement on the stock and the information in this catalogue.

PGG Wrightson, its employees and agents are not responsible or liable in any way whatsoever, whether in contract, tort (including negligence), or otherwise, to any person for any loss or damage whatsoever arising directly or indirectly from any information or representation included in or omitted from this catalogue.

CONDITIONS FOR BULL AUCTIONS CONDUCTED LIVE AT A SALEYARD/ON FARM

All intending purchasers must register at the PGG Wrightson Ltd Livestock (PGW) sales office prior to the sale.

The New Zealand Stock & Station Agent's Association Conditions of Sale apply. These terms can be inspected at the registration desk and on the wall in the auction room.

PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW.

The current versions of PGW's Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies and recognised independent livestock agents with a PGW Monthly Account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

CONDITIONS FOR BULL AUCTIONS CONDUCTED ON bidr®

All intending purchasers must register online at www.bidr.co.nz prior to the sale.

bidr®'s Conditions of Sale and Terms of Use apply. These terms can be inspected at <https://bidr.co.nz/content/user-terms-conditions>

PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW.

The current versions of PGW's Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock agents with a PGW Monthly Account that are also Accredited Agencies on bidr® where the buyer has registered on bidr® under that Accredited Agency.

Foreword

The Glenrossie Beef Shorthorn Stud was founded in 1969 with the purchase of Stud Loch females from Malcolm Anderson along with the imported bull Burnton Banter.

We have continued to use top Australian (AI) and New Zealand sires, including 2002 National Sale Beef Shorthorn Champion Austins Ideal 007 and 2013 National Sale Beef Shorthorn Champion Corsock Dazzler 11384. Our commitment to quality has never changed.

Our Santa Gertrudis cattle were originally graded up from selected Beef Shorthorn females and have been bred to the same commercial criteria as our Beef Shorthorns.

Current Sires are:

Longview Meatpacker 16062

Browns Unique

Rough Ridge Enhance 9

Ben Lomond JDAK1329

Polldale Neat (AI)

Hinewaka Gold 71/18

Waco Morris (P) (AI)

Bayview Archer M15 (AI)

Our aim has always been to breed structurally sound, well fleshed, fast growing bulls for commercial beef producers. Our cattle are run under commercial conditions on grass, silage and hay only.

We use utes, dogs and we work our cattle on foot. We do not use bikes or horses so please remember that the bulls will need time to get used to them. When your bull arrives please have a few quiet steers or in calf cows in the yards as mates for him. Put him and his mates in a smallish paddock with plenty of grass and feed him some hay or silage for the first week or two until he gets used to you and the routine on your farm.

We offer free delivery north of the Harbour Bridge and have added concessions for buyers further afield.

Bulls are TB accredited C10 and have been BVD tested and vaccinated. Bulls are fully guaranteed for 12 months from the date of purchase for structural soundness and fertility - if there is any problem, we want to know about it so we can fix it.

We do not do stud transfers for bulls with a purchase price less than \$5000.

PLEASE NOTE: When reading tables of data, the bottom row is ACTUAL weights and scanning data. The dates are the date of weighing. Scanning date was 17/02/24.

This sale will be a hybrid sale, live streamed on bidr. Any questions please ask us and we will be happy to help.

The Ody family.

Understanding Estimated Breed Values (EBVs)

Only 2024 Trans-Tasman Shorthorn GROUP BREEDPLAN EBVs or interim EBVs with Accuracy (Acc) can be validly compared between Shorthorn herds.

EBVs OF ONE BREED CANNOT BE COMPARED WITH EBVs OF ANOTHER BREED.

ESTIMATED BREEDING VALUES (EBVs): The EBV is an estimate of the genetic value of that particular animal for each trait measured.

ACCURACY: Accuracy (%) gives an indication of the amount of information that has been used in the calculation of that EBV. An accuracy of below 75% should be regarded as low, between 76-90% as medium and above 90% as high. Young bulls with performance data but no progeny will all have similarly low accuracies.

Average EBVs for 2022 born animals

CE DI	CE DT	GL	BW	200D	400D	600D	MCW	MILK
+1.6	+1.6	-1.5	+3.0	+28	+39	+51	+45	+6
SS	CWT	EMA	RIB	RUMP	RBY	IMF	SR	DI
+1.5	+34	+4.3	-0.2	+0.0	+0.9	+0.6	+\$68	+\$38

CALVING EASE:

Calving Ease EBVs(%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs indicate easier calving. **DI**=animal's influence on progeny. **DT**=daughter's calving ease.

GL: Gestation Length EBV. Lower or negative values indicate a shorter gestation length, therefore easier calving.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value, the lighter the calf at birth and the lower the likelihood of a difficult birth. Important when selecting sires for use over heifers.

FERTILITY:

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

GROWTH:

MILK: 200-Day Milk EBV (kg) is an estimate of the animal's milking ability. For sires, this EBV is indicative of their daughters milking ability as it affects the 200 and 400 day weight of their calves.

200W: 200-Day Growth EBV (kg) is calculated from the weight of animals taken from 80 to 300 days of age. Values are adjusted to 200 days and for age of dam. Best estimate of an animal's genetic merit for growth to early stages.

400W: 400-Day Weight EBV (kg) is calculated similar to 200W from animals 301-500 days of age. Best estimate of an animal's genetic merit for yearling weight.

600W: 600-Day Weight EBV (kg) is calculated similar to 400W from animals 501-900 days of age. Best estimate of an animal's genetic merit for growth beyond yearling age.

MCW: Mature Cow Weight EBV (kg) is an estimate of the genetic differences in cow weight at five years of age.

MEAT YIELD:

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the

12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

RIB: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP: Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield for the 300kg dressed carcass.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat (marbling) at the 12/13th rib site in a 300kg dressed carcass. Depending on market targets, larger more positive values are generally more favourable.

SELECTION INDICES

Shorthorn selection indices are calculated for two market specifications, namely, Self Replacing and Dairy. These Indices relate to typical commercial herds in New Zealand targeting these specifications.

Index values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd (where applicable). A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system.

Self Replacing Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial self replacing Shorthorn herd targeting the production of pasture finished steers. Steers are assumed marketed at 545 kg live weight (300 kg carcass weight and 10 mm P8 fat depth) at 18 months of age. Daughters are retained for breeding. This index is also suitable in situations where Shorthorn sires are used over mixed British breed cows.

Dairy Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial dairy herd using Shorthorn bulls over dairy cows targeting the production of pasture finished dairy beef progeny. Steers and heifers are assumed marketed at 520 kg live weight (280 kg carcass weight and 6 P8 mm fat depth) at 20 months of age. All progeny are slaughtered with no replacement females being retained.

The Trans-Tasman Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Shorthorn Society of Australia, the Beef Shorthorn Society of Australia, the New Zealand Beef Shorthorn Association nor the ABRI oversee or audit the collection of this data.

FMG Premier Bull Sale Insurance **FMG** Advice & Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser.

For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the “Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at **7.6%** of the purchase price (the sum insured for the bull). If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

✓ Infertility	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, or illness.
✓ Theft or death	We cover your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ Vet costs	We cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Bull Purchaser Instruction and FMG Insurance Slip

Please complete this slip and hand to the Booking Clerk before leaving the sale. This slip **MUST** be fully completed to be eligible for the 14 days free Premier Bull Insurance.

Purchaser/Agent full name:

If purchasing on behalf of, what is your relationship to owner?

Buyer No:

FMG Client Account Number:

Purchaser's full name:
